

The ProChrist Reviews

"This book was very enjoyable. There was spirituality, a story line based around a family, and suspense. I always looked forward to picking up where I left off."

"As a first novel, Mr. Gray shows he has a talent for the written word. While short of a home run, it is clear that the future is bright for this young author. It is a matter of time for Mr. Gray to find his inner scribe and master his chosen craft. I expect great things in future installments of Vensin's catalog of novels should he continue to write."

"Although religious/science fiction is not my usual genre of books I enjoy, however, I found the writing was good, the plot interesting. I liked the opening and the characters in the family the best."

"The author exhibits his imaginative prowess with this book. The imagery is captivating and you were destined to identify with one or more of the characters. The author's audacity and courage was also displayed in this book. He says things that we may have said to ourselves but never said aloud. He detached himself from a finite world and entered into one with possibilities; and he took the reader along for the ride. I enjoyed it because it kept the reader guessing and wanting to delve deeper into the plot. It creates a shell of possibilities and questions; a great foundation that will allow the remaining books to build upon. I for one am ecstatic about reading the next one."

"Especially loved the family drama. Author included typical situations that confront today's family. Are we so driven by church responsibilities that we neglect our families? The fates of the characters keep you turning the page to see who wins the battle!"
